Free classes sponsored by California Rural Water Association and San Diego Department of Environmental Health

May 4:

Water Accountability: Discussion will be about water accountability from the standpoint of meter calibrations, unaccounted-for water loss, and production vs. water sold.

Leak Detection: Review of preliminary survey, zones and zone measurements, pinpointing leaks, estimating leaks, hands-on discussion & demonstration of leak detection, modern methods of leak detection, sonic leak detection, correlation equipment, and demonstration and practical use of leak detection equipment.

May 5:

Groundwater Rule Review

The purpose of the Federal Groundwater Rule (GWR) is to reduce disease incidence associated with disease-causing microorganisms in drinking water. The rule applies to all systems that use groundwater as a source of drinking water. This class will review the GWR and how it affects you and your system.

Water Sampling Techniques

Proper Hand Sanitation, Why Take a Water Sample?, What is the Total Coliform Rule (TCR)? A sample-siting plan is required for all Small Water Systems according to the California Code of Regulations, Title 22. This plan is an important element in the prevention of water borne illness because it is useful in quickly evaluating contamination events.
